

Sagar Bhimani

Senior Symfony Backend Developer | PHP | API Platform | REST APIs | PostgreSQL

Email: sbhimani1991@gmail.com | Phone: +91 94295 66166 | Location: Rajkot, Gujarat, India

Professional Summary

Results-driven Senior Backend Developer with 10+ years of experience in PHP development, Symfony framework, API Platform, REST APIs, and enterprise backend systems. Strong expertise in scalable backend architecture, third-party integrations, PostgreSQL, MySQL, Amazon S3, and performance optimization.

Technical Skills

Backend: PHP, Symfony, Zend, API Platform, Laravel, CodeIgniter, Magento

Frontend: Twig, HTML5, CSS3, SCSS, JavaScript, jQuery, React.js

Database: PostgreSQL, MySQL, DbWeaver

Tools: GitHub, Swagger UI, REST APIs, Amazon S3

Professional Experience

Techiebutler — Senior Backend Developer

06/2025 - Present | Rajkot, India

Projects: MortgageFinder (PropertyFinder Group) [Dubai project]

- Developed scalable REST APIs and backend workflows **using Symfony**.
- Implemented Amazon S3 document upload functionality.
- Integrated Braze email services and backend workflows.
- Worked on performance optimization and feature enhancements

ProlixTechnikos — Symfony Developer

11/2018 - 31 May 2026 | Rajkot, India

- Developed enterprise applications **using Symfony**, API Platform, Twig, and PostgreSQL/MySQL.
- Built REST APIs and backend modules for international business platforms.
- Worked on frontend integration using Twig, SCSS, JavaScript, jQuery, and React.js.

Projects:

Compare Club

- Worked on both the backend (API) and frontend (AMS/Admin Panel) **using Symfony** and Twig.
- Managed database-related tasks using DbWeaver and contributed to upgrading Symfony and PHP versions for both the API and AMS applications.
- Worked on frontend features using React.js and collaborated with teams based in India and Australia as part of the development process.

Halo-Analitica [Australia project]

- The Halo-Analitica project focuses on implementing fingerprint machine systems at construction sites for attendance management and related functionalities.

- The backend was developed using **API Platform with the Symfony framework**, where all features were implemented through RESTful APIs using GET, POST, PATCH, PUT and DELETE methods.
- APIs were fully documented and available through Swagger UI. PostgreSQL was used as the database system.
- Frontend development was initiated using React.js, and I worked on this project as a Backend Developer.

Cocorico Main Domain [France projects]

- Multiple projects under the Cocorico domain, including BDT, Sora, 52Entertainment, Real Data, Home Exchange, and others, were developed **using Symfony** for the backend and Twig templates, SCSS, JavaScript, and jQuery for the frontend.
- MySQL was used as the database system, and project designs were implemented based on Figma designs and requirements.
- Worked as part of the development team and regularly attended meetings with the Project Manager and QA team based in **France**.

Vispan Solution Pvt. Ltd. — PHP Developer

03/2015 - 10/2018 | Rajkot, India

- Worked on Magento-based projects and SOAP/REST API integrations.

Projects: Stride Travel [USA project]

- Worked with the **Magento framework**, focusing on API-related tasks including fetching data through **SOAP** and **REST** APIs and displaying it on the front end.
- Collaborated as part of the development team with clients and QA teams based in the United States and regularly participated in project meetings and discussions.

Superior Techno. — Developer

05/2014 - 10/2014 | Rajkot, India

- Worked on PHP web application development and maintenance tasks.

Education

M.C.A — B. H. Gardi College of Engineering & Technology, Rajkot (2011 - 2014)
